Subject: Daily NWS Threat Brief for Thursday, August 23, 2012 for FEMA Region 6
Date: 08/23/2012 07:44 AM
Attachments: [20120823_FEMA_Region6_Brief.pdf](#)

Greetings,

Attached is the National Weather Service Threat Briefing for Thursday, August 23, 2012 for FEMA Region 6

Key Points:

- **Thursday**
 - Thunderstorms with heavy rainfall possible across NM
 - Heavy rainfall could cause flash flooding over the burn scarred areas of NM, particularly the Las Conchas, Whitewater Baldy, Little Bear, and White burn scars.
 - Critical Fire Weather conditions over northeast OK
- **Friday - Saturday**
 - No Significant Weather Threats
- **Sunday - Monday**
 - No Significant Weather Threats
- **Tropical Outlook**
 - TS Isaac is located south-southeast of Puerto Rico and continues to move west. Isaac will continue moving west today, then northwest over the weekend and into the early part of next week, moving over Florida/eastern Gulf. *No Impacts are expected to FEMA R6 from Isaac through Monday.*

Please feel free to contact us if you have any questions or need any additional information.

The NWS SR ROC is looking for feedback on this briefing! Please take a few minutes and visit <http://www.surveymonkey.com/s/RP3Y3GT> to answer some questions and provide any feedback you may have - thank you for your participation!

Regards,

9470342
